Triplex Panel with Gauge Center

Basic Duplex Panel
with Disconnect Switches

Panel-Pac system control centers are engineered and assembled by our "in house" controls group. These experienced electrical engineers and technicians provide the expertise necessary to meet diverse requirements from motor control to any level of monitoring, alarm function or automation the project demands. Special attention is given to circuit and operator safety.

Step up to a BFS fully-integrated state of the art system

Value Added Features

- ▼ Industrial heavy duty components
- ▼ Technical support
- ▼ Stranded machine tool type wire
- ▼ Control circuit transformers include fused primary and secondary circuits
- ▼ Circuitry designed for maximum reliability
- ▼ All control wiring color coded
- ▼ Job specific wiring diagrams
- ▼ Control circuits to remote devices are fused
- ▼ Dependable alternating circuits
- ▼ All exterior components have engraved nameplates
- ▼ Interior termination points clearly marked and coordinated with wiring diagrams
- ▼ UL panel listing capable
- ▼ Complete remote read-out gauge centers for temperature and pressure
- ▼ Options tailored to suit job conditions

Typical Free Standing Panel
