

Project **OWENSBORO GRAIN**

Owensboro Grain

Description

The project was to add a new 150,000 pph O Type Victory IWT with a high performance Limpsfield Burner and Autoflame controls. Also included was a deaerator replacement located in the existing building. This is the lead boiler for this facility replacing the old coal operation.

Design/Build Project

WARE was responsible for the Design , Engineering, Procurement and construction of the project from the foundation to start-up.
