

HelioJET - Conveyor Belt Cleaning Application

The following is a HelioPAC 1500 supplying 5 gpm of water at 165 psi and 175 degrees Fahrenheit to clean "baking residue (cakes, cookies) from conveyor belt shown below. The application reduced water consumption from 12 gpm to 5 gpm and cleaning time by 41%. Inputs are 45 psi water and 130 psi steam.

Discharge of HelioJET to Conveyor Belt
