

# Reduce Emissions and Save Big

Being good to the environment doesn't have to cost you money

**Typical Savings 12-15%**

The latest in technology of it's kind, this burner is designed to maximize efficiency, reduce fuel usage and reduce the carbon footprint in firetube and watertube boilers. **Performance Guaranteed!**

**Typical Savings 5-7%**

Recognized World Leader in combustion management solutions. First in the world to develop an electronic fuel/air ratio control for burners and have maintained their market leadership through constant development and innovation. **Performance Guaranteed!**

**Typical Savings 5%**

High fuel prices are here to stay. If your boiler is not equipped with an economizer then your wasting energy up your stack. The Heatsponge economizer was developed to recover this wasted energy while being easy to install and maintain. **Performance Guaranteed!**

**Recovery Typical Savings 3-5%**

Individually designed system for your boiler blowdown and make-up requirements. Providing 90-95% heat recovery from the continuous blowdown. **Performance Guaranteed!**

**Typical Savings 3-5%**

Steam System and Combustion Analysis, Preventive Maintenance, Boiler University, Customized Training, Contingency Planning and more. **Performance Guaranteed!**

**Everyone has ideas..  
We Guarantee the results!**
